

An Economical Simple Neutralizer

Features Include:

- Non-Corrosive poly mineral tank.
- Top Quality Long Life neutralizing media (Hydroflo Calcite not included).
- Convenient dome hole with cap for accessibility when replacing media.

The **Hydroflo UF 1054D Neutralizer** is your solution to eliminating blue-green stains. These stains are caused by acidic water (pH levels below 7.0) corroding copper plumbing.

When the UF 1054D installed with 1.5 cubic feet of Hydroflo Calcite, pH levels between 5.8-6.5 are neutralized to about 7.0 and leaky fixtures and plumbing, along with blue-green stains are gone.

Specifications **UF 1054D**

Mineral (Cu. Ft./Lbs.)	1.5/140
Mineral Tank Size	10" x 54"
Service Flow (gpm)	7
Backwash Rate (gpm)	4.0
Pipe Size	3/4"
Max. Pressure (psi)	125
Max. Temperature, F°	100°

All neutralizers raise hardness 1-3 gpg, therefore, we recommend that the UF 1054D be followed by a Hydroflo Calcite, pH levels between 5.8-6.5 are neutralized to about 7.0 and leaky fixtures and plumbing, along with blue-green stains are gone.

Hydroflo Calcite media is sacrificial and must be replenished as needed.
