Neutralite
pH Media Mix

A8001
MB700*

Note: Due to natural attrition neutralizing mineral must be replenished periodically. Acid neutralizers may raise hardness levels.

*PH levels below 6.0 use MB700. A chemical feed pump may be required in some cases. Contact a customer service representative for scheduled service program.

ATS Acid Neutralizer

The ATS Acid Neutralizers is your solution to solving tough acidic water problems in your home. Our systems are made to exact specifications to neutralize the free carbon dioxide in your water therefore stopping and preventing further corrosion of your homes plumbing, pipes, and water using appliances. PH between 5.8-6.5 are neutralized to normal 7.0 to 7.5.
